Abstract (en)

[origin: US5080812A] A new class of antiwear and extreme-pressure additives consisting of thiophosphoretted compounds obtained by reacting phosphorus sulfides, especially phosphorus decasulfide P₄S₁₀, with surbasic detergent additives, is described. The reaction product can be optionally treated by at least one active hydrogen compound: water, alcohol, phenol, acid, ammonia, amine, amide and/or mercaptan.
