Abstract (en)

[origin: WO8903422A1] Synthetic DNA coding for streptavidin includes sequence (I) and incorporates useful restriction sites at frequent intervals to facilitate the cassette mutagenesis of selected regions. Also included are flanking restriction sites to simplify the incorporation of the gene into any desired expression system.

Abstract (fr)

ADN synthétique codant la streptavidine, comprenant la séquence (I) et comportant des sites de restriction utiles à des intervalles fréquents, afin de faciliter la mutagénèse de cassettes de régions sélectionnées. Sont également inclus des sites de restriction latéraux afin de simplifier l'incorporation du gène dans n'importe quel système d'expression voulu.
