Abstract (en)  
The electric incandescent lamp has incandescent bodies (3, 4), each comprising an axial leg (7, 9) and a transversal leg (8, 10). The legs (7, 9; 8, 10) are connected to end portions (15, 17; 16, 18) of current supply conductors (11, 13; 12, 14) which extend at right angles to them, so that deformation of the incandescent bodies during or after mounting is counteracted.
