Abstract (en)
[origin: EP0392088A2] In a multipole connection between a central electronic apparatus and a plurality of peripheral apparatuses, the connection parts on the cable side are designed such that they could be introduced into the connection which is mounted in a fixed manner on the central apparatus in a positively locking manner and such that they cannot be confused, and, according to Fig. 2, complement one another to form the overall contour of the connection. <IMAGE>
