Abstract (en)

[origin: EP0392278A1] The invention relates to a method and a device for assigning quality data to bobbin supports (5) equipped with cops (4) in a machine system consisting of at least one ring spinning machine (1) and at least one winding machine (2), which are connected to one another by means of a converter (3). According to the invention, the bobbin supports (5) equipped with cops (4) are assigned in the region of the converter (3) data which relate to different yarn qualities. At the same time, the converter is equipped with at least one sensor (10; 11), with a control device (12) and with a coding device (13). <IMAGE>
