Abstract (en)
[origin: EP0392817A2] The table has a base structure 1 which is pivotally coupled via a connecting member 15 and an intermediate member 16 to a top 2. By standing the base on either of two adjacent sides and pivoting the top by the connecting member 15, the top can be rested on the base at two different heights. The top is formed by two hinged leaves 31 and 32, and at either height the top can be swivelled on the intermediate member 16 and opened out to provide an extended surface area. In the higher position the top can also be fixed in an inclined position for use as a drawing board.
