Abstract (en)
[origin: EP0393355A2] The invention relates to a coke-pushing machine for coke ovens, in which all the drives for carrying out the working steps of moving, pushing and levelling are connected to a common hydraulic overall drive by means of a closed circulation of the pressure medium. Only one working step is always operated with the available power, the working steps of moving, pushing and levelling being carried out one after the other.
