Abstract (en)

[origin: JPH0356269A] PURPOSE: To develop economical production and increase consumers' usability by shifting a tear-open flap provided with an adhesive tape at the upper end wall to the extended part of the flap at first and to the opening position secondly, when the flap is opened. CONSTITUTION: When opening the pack, a grasping lug 35 of a holding flap 34 is pulled up from the rear wall 11, an outer longitudinal flap 25 is uplifted from the plane position of the upper end wall 14. A tear-open flap 27 is torn out of the front wall 10 by tearing flap-cutting-off lines 29, 30 and a tear-opening is formed at the full width of the front wall 10. In this way, tissue paper 17 can be easily drawn out without requiring a special force. The tear-open flap 27 and the outer longitudinal flap 25 can be turned to the original position and the adhesive tape 33 and the lug 35 can be stuck on the rear wall 11 to close the pack again.
