Abstract (en)

In a movable device to carry out the slotted leno heald weave on selvedges of fabrics as they are formed on shuttleless looms - of the type independent from the heald frames, with a separate control therefrom which alternatively causes the lifting and lowering of selvedge shafts (11-14) - to said selvedge shafts (11-14) there is associated at least one group of two links (15, 16) and a half-link of suitably reduced dimensions controlled by said selvedge shafts (11-14) to carry out the slotted leno heald weave.
