Abstract (en)
[origin: EP0393561A2] An inking roller, for example a screen roller (7), is provided with a sleeve (34) bearing screen engravings. The sleeve (34) is pushed through the opening (31) which is provided in a side wall (1) in the region of the inking unit, a bearing, i.e. the bearing pin (33), having previously been exposed and the screen roller (7) being held on the other side via an extended axle journal (32) by an auxiliary holding device (35, 36, 37) in such a way that the screen roller (7) to be provided with the sleeve (34) is fixed. <IMAGE>
