Abstract (en)

[origin: EP0393777A2] Process and apparatus for drying and/or cooling of a product containing one or more evaporable substances. The invention relates to a process for cooling and/or drying of comminuted products, like granules, powders etc. in a continuous vacuum treatment, wherein the product preferably is subjected to a pre-deaeration. The invention is especially suited for cooling of cattle feed pellets to control odour emission. An apparatus for carrying out the process is indicated in figure 1.
