Abstract (en)
[origin: EP0394150A1] Tile of rectangular and plane general shape and possessing a central zone forming a horn-shape (9) fitting the profile of the constituent tiles of the roof which it has to cover. According to the invention the horn-shape (9) is limited on the upper edge side of the tile by a surface (23) for joining to a ridge tile, and its lower transverse edge is provided, at least in its lateral zones, with two heels (15, 16) forming moulds, disposed on the side of the tile bearing against the frame. <IMAGE>
