Abstract (en)

[origin: EP0394835A2] A simple and cost-effective process of manufacturing a ski is to be made available. For this purpose, an upper part (10) of the ski, consisting at least of a covering layer (12), is formed in a mould (18, 20) in such a way that flange-type edges (22) are moulded onto the covering layer (12). A bottom part of the ski is placed on the top part (10) of the ski in such a way that it is flush in the edge region with the flange-shaped edges (22) and finally the bottom part of the ski and the top part (10) of the ski are joined together. <IMAGE>
