Abstract (en)

[origin: EP0394885A1] In a mobile cleaning and operating device (10) for textile machines (26), especially for high-speed ring spinning machines, a suction and/or blowing unit (16) is provided laterally of the textile machine (26), the cleaning and operating device (10) having at least one operating arm (46) which is mounted movably relative to the suction and/or blowing unit (16). The operating arm (16) can be moved into a working position, in which it can be activated in the immediate vicinity of working elements of the textile machine (26). At the same time, at least one further operating function can be carried out. <IMAGE>
