Abstract (en)
[origin: EP0395003A2] The present invention provides a recording apparatus comprising supply means (21) for supplying a sheet (3), a sheet directing path (23a, 23b) for directing the sheet supplied by the supply means (21) to a recording portion, a sheet ejection path (11) for directing the sheet recorded at the recording portion to an ejection outlet (11), guide means for guiding a sheet to be introduced from the ejection outlet, and sheet feeding means for directing the introduced sheet to the recording portion through the sheet ejection (11) path and thereafter for returning the sheet to the ejection outlet (11).
