Abstract (en)

[origin: EP0395167A1] The present invention relates to a device for making a borehole in the ground by the use of a pipe which is equipped at one end with a drilling head, comprising a drum (1) on which said pipe is wound, means for rotating the drum in one direction or the other and a straightening appliance (12) for bending the pipe (10) at the desired angle or straightening it, said straightening appliance ensuring the necessary longitudinal displacements of the pipe (10), and to a process for making a borehole in the ground. <IMAGE>
