Abstract (en)
[origin: EP0395171A1] Lighting fixture having a box-shaped housing, which is provided with a rectangular bottom plate (2) and four side plates (3,3,4,4) which are located in pairs, spaced from each other by some distance and being parallel to each other, said side plates defining a rectangular lighting opening (5) opposite the rectangular bottom plate (2), and with side reflectors (11), as well as with lighting equipment including an elongated light source (9). A part of the bottom plate (2) associated with the location of the elongated light source (9) is formed in the shape of a top reflector. Method of producing a lighting fixture wherein the top reflector shape is formed in the bottom plate (2) by means of a stamp.
