Abstract (en)

[origin: EP0395524A1] An installation for the continuous filling of a tubular casing (44) with fibrous material, includes a tubular support (40; 42) around which a casing has been placed, a duct (26; 28) connecting the interior of the tubular support to a source of fibrous material (22), and means for transporting the fibrous material between said source (22) and the casing via the duct. According to the invention, said transfer means include an air current, the installation also having means for adjusting the air flow from inside the casing to the outside in order to control the density of the fibrous material in the casing.
