Abstract (en)

Shoe whose closure system of the upper is protected by a retractable transverse flap intended, when putting the shoe on or taking it off, to be moved aside in order to give access to the closure system, the flap being able to flip over laterally, about one of its edges, relative to the upper, the articulation of the flap on the upper consisting of a preferential articulation zone (8) facilitating the pivoting of the flap (3) from one position to the other. <IMAGE>
