Abstract (en)

Novel composition system for work surfaces which are modulable in terms of shapes and dimensions, of the type consisting, on the one hand, of table tops (1) of compatible shapes and dimensions, capable of being juxtaposed according to requirements, and, on the other hand, of legs which are attachable to these table tops with a view to providing the stable support and integration thereof under the lower face of each table top, there being fixed, on each pair of opposite sides, pairs of slides (3) perpendicular to these sides, characterised in that with each pair of slides is associated a single central leg (5) carrying, at its upper part (8), a plate having two parallel shoulders (7) separated by the same distance as the said slides and sliding between the lower face of the said table top and the upper face of each slide. <IMAGE>
