Abstract (en)

[origin: WO8906773A1] A cooking apparatus ventilation system which evacuates smoke and vapors to allow indoor cooking. Air is evacuated through ventilation channels (70, 72) which surround all but one side of the cooking surface (80). A layer of air is directed from the fourth side across the cooking surface (80) to push the smoke and vapor into the ventilation channels (70, 72).
