Abstract (en)

[origin: EP0395861A1] The invention relates to method according to the pre-characterising clause of Claim 1. <??>The object of the invention is, whilst making do without chemicals of any kind, to achieve a decatizing and fixing effect continuously, the material waste having no difference on the two sides, namely on the left-hand and on the right-hand side. <??>In the method of the generic type, this object is achieved in that the textile material is moistened in a moisture range of 20 to 100%, in that the surface temperature of the heatable cylinder of each treatment stage is higher than 140 DEG C, and in that the textile material rests with its left-hand side on the heatable cylinder in treatment stage I and with its right-hand side on the heatable cylinder in treatment stage II. <IMAGE>
