Abstract (en)
[origin: EP0396067A2] A profile grinding device, with a tool holder 14, 14' which is fastened in a frame 1 and to which a grinding tool 15, 15' of the desired profile shape can be fastened, for machining workpieces 3 transported past the profile grinding device in a working plane permits quick arrangement of the tool 15, 15' in different angular positions owing to the fact that the tool holder 14, 14' is fastened to a mounting fixture 13, 13' with a bearing face 16, 16' arranged perpendicularly to the conveying plane and direction, and that the tool holder 14, 14' can be detachably fastened to the mounting fixture 13, 13' in various angular positions. Here, at least two tool holders 14, 14' can preferably be arranged in various angular positions in a frame 1 of the profile grinding device. <IMAGE>
