Abstract (en)

[origin: WO8907304A1] A procedure for protection against disasters and pollution is characterized by the following steps: a) a fully automated alarm; b) verification of the alarm; c) reconnaissance of the site; d) computer-assisted analysis; e) establishment of a computer menu using stored data, in particular alarm plans; f) display of the menu as an aid to decisionmaking in a control centre; g) institution of appropriate measures following decisionmaking and possibly incorporation of additions and corrections.
