Abstract (en)

A method is provided for immobilizing articles (3) which are placed loosely in a packaging (1) that is closed on all sides, by use of an inflatable body (4) which occupies the space left free in the packaging (1) by the articles (3). After closing three of four flaps (2) of the packaging (1), the inflatable body (4), an open side (5) of which protrudes outside the packaging (1), is inflated and sealed. The protruding side (5) is then folded shut with the last flap (2). Also a packaging (1) is provided, to be used when applying the above method of immobilisation.
