Abstract (en)
[origin: WO8905114A1] The disposable impregnated wipe consists of a woven or non-woven hydrophilic material, obtained by wet or dry method and having a maximum absorption capacity for water of at least 200 % by weight in the dry state, impregnated with an aqueous composition to a level not exceeding 50 % of the maximum absorption capacity and is characterized in that the aqueous composition occurs in the form of an aqueous solution containing at least 4 % by weight based on the total weight of the aqueous composition of at least one water-miscible solvent and at least one mineral or organic acid in amount sufficient to produce an acid pH in the said solution.
