Abstract (en)
[origin: JPH0317992A] PURPOSE: To automatize the mounting work by connecting an edge part of a pin inserted from an outside of an electric hot plate, with an inner edge of a comparatively long connecting lead. CONSTITUTION: An inner edge 25 of at least one lead, is connected with at least one pin 13 which can be inserted from an outside of an electric hot plate 1, the pin 13 is made of a wire 11, and the position of the inner edge 25 of the lead 22 is fixed by an insulator 9 or the like. Accordingly the adjustment of the direction or the arrangement of the inner edge 25 of the lead 22 to the pin 13, or the insulator 9 and the electric hot plate 1, can be easily performed. That is, the mounting work can be automatized.
