Abstract (en)
[origin: EP0399230A2] A suspension device for wall cabinets, wherein a triangular device housing (1) abuts the underside of the top end (9) and the side wall (10). The attachment of the device housing (1) in the cabinet is effected by dowel pins (7) which are plugged into boreholes (8). The boreholes are located in the region of a groove (11) for receiving the rear wall (4) and are tangential to the groove (11). <IMAGE>
