Abstract (en)

[origin: EP0399274A2] The invention relates to a flat plastic-coated material in sheet form or fitted form using a support having a latex foam coating for the production of articles of different types, for example shoe insoles or parts of shoe insoles in the form of a padded stamped article or in the form of a glove, in particular of a goalkeeper's glove, in which a substrate comprising a fabric or a nonwoven or natural or synthetic fibres with a latex foam layer applied on top, which may be embossed with a latex containing blowing agent, is coated or printed. <IMAGE>
