Abstract (en)
[origin: EP0399878A1] Mixer comprising a removable bowl (20), a bowl support (22), a head (14) especially with a tool-carrier plate (40) on which a tool (44) is mounted, a body (12) comprising a device (16) for raising and lowering the bowl support, consisting of at least one vertically oriented column (24) integrally fastened to the bowl support and of a mechanism (28, 30 and 32) for driving this column in translation between two positions, high and low, along its lengthwise axis, as well as a movable protective screen (18), characterised in that this screen is movable in translation or in rotation about an axis between a closed position and a open position and in that this screen is connected to this column by driving means so that the high and low positions of this column correspond to the closed and open positions of the screen respectively. <IMAGE>
