Abstract (en)
[origin: EP0399919A1] The station of a disconnectable cableway with two or more carrying-hauling ropes (10, 12) comprises return pulleys (20, 22) arranged under the floor (34). After the uncoupling of the vehicles (24), the carrying-hauling ropes (10, 12) pass over downward deflection means (30, 32; 36, 38) which direct the ropes towards the return pulleys (20, 22). The vehicles disconnected from the ropes pass between the deflection pulleys towards the rear of the station. <IMAGE>
