Abstract (en)  
[origin: EP0400260A2] The apparatus, which is of the tangential friction type, comprises a belt (1) driven for sliding along the major axis of the apparatus and rotatively driving, with a set rotary speed, the spindles (7) of the ring spinning machine, the belt being entrained between tension rollers (6) and transmission rollers (5) of which at least one is provided with a braking device.
