Abstract (en)

A masking tool (120) employed to protect the projection(s) (131) of an article (130) such as a car body from a surface treatment and a masking method employing said masking tool (120) are provided in the present invention. Said masking member (111) comprises a cylinder (121) having an inlet (122) at one end and an outlet (123) at the other end, a plural number of cap or clip type masking member's (111) and being put in said cylinder (121) to be placed one upon another, and a transporting means arranged in said cylinder (121) to transport said masking members (111) successively from the inlet (122) to the outlet (123) of said cylinder (121) to put said masking members (111) over said projection(s) (131) of said article (130).
