Abstract (en)
[origin: EP0400826A1] A flexible container (10), including a closed end (16), the closed end being formed by folding an open end portion (19), and joining means joining said folded end portion (19) to the body of the flexible container (10), said joining means being arranged so as to join said folded end portion to said body more strongly over outer sections (26, 27) adjacent each side edge (23, 24) of said flexible container than over an inner section (28) spaced from said side edges.
