Abstract (en)
[origin: WO8907969A1] A jigsaw holder (10) comprises a support member (11) on which the jigsaw (13) can be assembled, a cover means (15) pivoted or hinged to the support member so as to be able to overlie the latter, the surface of the cover means adapted to lie adjacent the support member being of a compressible non-slip nature, to lock assembled jigsaw pieces in position, and means for releasably securing the cover means in overlying relationship to the support member. The support member is also of a non-slip compressible nature. A retaining sheet (21) is provided to trap non-assembled jigsaw pieces between same and the cover means.

Abstract (fr)
Un support (10) de jeu de patience à découper comprend un élément de support (11) sur lequel on peut assembler ledit jeu (13), un rabat (15) pivotant ou articulé sur l'élément de support de manière à pouvoir recouvrir ce dernier, la surface du rabat adaptée pour reposer à proximité de l'élément de support étant de nature compressible non glissante, afin de bloquer les éléments assemblés dudit jeu. Il comprend également un moyen permettant de fixer de manière libérable le rabat pour couvrir l'élément de support. L'élément de support est aussi de nature compressible non glissante. On a prévu une plaque de retenue (21) afin de piéger les éléments non assemblés dudit jeu entre ladite plaque et le rabat.
