Abstract (en)

A method of producing color spots in repetitive, non-regular patterns on a fabric layer (1), wherein the fabric is caused to move in one direction and a dyestuff is sprayed on to the moving fabric by means of one or more spray nozzles (10) to which a reciprocating motion is imparted along guide means (4) arranged to be orthogonal to the direction in which the fabric is moved. The invention also relates to a machine for carrying out the method.
