Abstract (en)  
[origin: EP0401494A1] The invention relates to a bag for waste disposal, consisting of a flexible bag part (1) which is closed at the bottom, a rigid bag collar (2) which encloses the upper end of the flexible bag part and is fixedly connected thereto, and a lid (3) with which the bag part (1) is to be sealed in the region of the bag collar (4). The bag collar (2) possesses bearing elements (4) on its periphery for the lid (3), so that the lid can easily be lifted off and laid on or in the bag collar. Locking elements (10) are arranged on the bag collar below the bearing elements (4) and interact with compatible elements of the lid (3), so that the lid can be firmly connected to the collar. A handle is attached to the lid. <IMAGE>
