Abstract (en)
[origin: EP0401620A1] In a rotor (1) with fixed comminution tools for slow-running comminution machines, in particular for bulky waste material, protective caps (7) are mounted on a rotating carrying body (1) in such a way that the transmission of force between protective cap (7) and carrying body (1) occurs by means of a connection which is located inside the area covered by the protective cap and is secured by a connection located preferably in the non-wearing area. <IMAGE>
