Abstract (en)
[origin: EP0401710A1] The invention relates to an internal combustion engine (1) for vehicles comprising an output shaft (16) disposed in parallel with the crankshaft of the engine for transmitting the output power to the wheel shafts of the vehicle. The present invention is characterized in that the accessory drive pulley (50) supported by the output shaft (16) is located laterally opposite a crankshaft bearing and, preferably, disposed to be at least partially accommodated through a concave formed at the position of the crankshaft bearing (60).
