Abstract (en)

[origin: EP0402252A1] The invention relates to a security lock for access doors to the interior of the drum of a washing machine. The doors (10 and 20) of the drum are fixed to one another by means of hooks (12) and slots (22). One of the doors (10), which possesses a recess (11) is equipped with a security lock (30) consisting of a pusher (31) with a base (32) returned towards the collar (41) of a hollow pedestal (40) forming an angle alpha relative to the flat bottom of a recess (11) in the opposite direction to the hooks (12). The invention is used on rotary-drum machines.
