Abstract (en)  
The invention relates to an anvil made of steel extending along an essentially horizontal axis and along a vertical axis and comprising a base (3), a body (2) comprising a round horn (8) and a square horn (15) arranged on either side of a table (10). The invention relates to portable anvils intended in particular for farriery, so as to allow a farrier to practise his art with a maximum of facilities, even under itinerant conditions.
