Abstract (en)  
[origin: WO8907930A1] This invention relates to novel storage stable activated protein containing compositions comprising reducing agents, for example ammonium thioglycollate, and optionally, oxidizing agents, for example, hydrogen peroxide and/or antioxidants, preferably volatile antioxidants. The compositions are useful for conditioning horny keratinous tissue of mammals such as human hair and nails, and the hooves and fur of animals to improve their strength and appearance. In addition, these compositions are useful for promoting hair and nail growth.
