Abstract (en)

[origin: EP0404258A2] A cuvette (1) of elongated form with a small rectangular internal section (7) for medical and similar analyses performed by passing a light ray through a product (7a) to be examined, comprising at least one larger external surface (9) in the form of a lens in the transverse direction, this lens being capable of deflecting the light ray in a preferred direction as it passes through the thickness of the cuvette and before it reaches the product through which it is to pass for the examination.
