Abstract (en)

[origin: EP0405061A1] The device for fixing emergency keys or the like has a mechanical lock which is connected to a shell for the emergency key and which can be inserted, together with the shell, into a wall or the like and taken out in order to extract the emergency key. To prevent misuse, the shell 3 is safeguarded by an additional electronic or electrical locking device 8, 9 which can be actuated remotely. <IMAGE>
