Abstract (en)

[origin: EP0405675A1] Interlockable building panel, consisting of at least two parallel plates, between which isolating material is applied, the panel being provided with at least one edge made of metal sheet, profiled in cross-section, which edge can interact with the edge of a second building panel, in such a way that the building panel can be interlocked with this second building panel, pivoting upon an axis perpendicular to the cross-section of the edge, characterized in that the edge consists of two metal plates (1,2), made for that purpose, of which plates one (1) has a U- or V-profile in cross-section, and the other one (2) has an L- or U-profile in cross-section, the second plate totally or partially closing the open side of the U- or V-profile of the first plate.
