Abstract (en)

[origin: EP0372431A1] The invention relates to a detonator (8), especially for detonating a propellant charge (7) of a recoilless anti-tank weapon (1). In order to reduce the production costs of such detonators and simplify their operation, the invention proposes to make the casing (31) of the detonator (22) in one piece with a conical outer wall (32) which is fitted into a suitably shaped aperture (21).
