Abstract (en)

[origin: EP0406556A1] A box (1), in particular having a lid which can be swivelled onto the top side (4), is intended for packaging food, such as biscuits, chocolates, snacks or the like, or other articles, the top side (4) having a window (11), the box (1) being lined on the inside with a film (12), and the film (12) being provided with a tear-off element. Easy and convenient opening is achieved in that the tear-off element is constructed as a tear-off frame (15) which connects the window (11) to the top side (4) via the edge (16) of the window and whose inside surface is fixed to the outside of the film (12). <IMAGE>
