Abstract (en)  
[origin: WO9008861A1] A structure comprising a first fixed chamber (11) and at least a second chamber (12) encompassing the fixed chamber (11), whereby the second chamber is located so as to be able to slide transversely relative to the axis of the fixed chamber in order to extend the internal volume of the structure. The sliding chamber, or each such chamber, is advantageously located on a structure which slides on rolling means (29). The extendable structure can be moved in the form of a trailer or a semi-trailer (1) or is transportable in the form of a container.

Abstract (fr)  
Une construction comprenant un premier caisson fixe (11) et au moins un second caisson (12) enveloppant le caisson fixe (11) ledit second caisson étant monté de manière à pouvoir coulisser transversalement à un axe du caisson fixe afin d'étendre le volume intérieur de la construction. Le ou chaque caisson coulissant est avantageusement monté sur une structure glissant sur des moyens de roulement (29). La construction extensible peut être déplaçable sous la forme d'une remorque ou d'un semi-remorque (1) ou être transportable sous la forme d'un container.
