Abstract (en)

[origin: CA2017824A1] Summary: In this illuminating equipment for the illumination of escalators and travelling walkways, light sources (11), the light (13) of which is deflected by means of lenses (12) to middle limbs (9; 10) of a support device (5) carrying the handrail (4), are provided in the balustrade pedestal (2; 3). The light (13) is deflected away into the desired direction by suitable shaping and surface property of the middle limbs (9; 10). The illumination equipment according to the invention serves not only for the illumination, but equally for the decorative make-up of escalators and travelling walkways. (Fig. 1)
