Abstract (en)

[origin: WO9009623A1] Date displaying device, particularly for an electric clockwork piece capable of displaying dates which correspond in at least two calendars of different systems. The date is displayed in an opto-electronic alphanumerical form on a display unit (2). The passage from one date of a system to another is carried out by actuating one or a plurality of push buttons (not shown). The example appearing in Fig. 1 and 2 is the display of a date in the republican calendar (Fig. 1) and the display of the corresponding date in the gregorian calendar (Fig. 2).
